# Training Information

## Estimator & Technician Training

BETAG offers a comprehensive range of instructor led, technical training classes – for estimators and technicians of all experience levels.

## Training Objectives

Learning new skills and techniques will:

- ▶ Improve overall quality of repairs and reduce reworks;
- ▶ Increase ‘touch time’ and productivity; and
- ▶ Reduce ‘key to key’ and repair times.

Estimators and technicians will return to work confident in their new skills and ready to add immediate value by increasing workshop productivity.

“After being in the industry for over 30 years I never thought I would learn something new about metal work.

I can say without a doubt after this week I will never look at dent repair the same way again. These guys are truly masters at their trade. If you ever have an opportunity to take one of their classes don't hesitate, you won't regret a second of it.”

**Jim Wensel – Technical Trainer, Gerber Collision & Glass (May 2018)**
